

SHIRE 110/140AMP ALTERNATOR REPLACEMENT

The 110Amp & 140Amp alternators are no longer available and cannot be supplied, below you will find details on the replacement parts to upgrade to the 150Amp Alternator.

Please note that not all the below parts will be needed. Please check your engines original alternator mountings first before purchasing the replacement parts as these may already be fitted.

1x RDG20110201 150Amp Alternator

1x RDG4019723 Adjuster Bracket

2x RDG3940 M10x50 Hex HD Screw

2x RDG627 M10 Lock Nut

4x RDG628 M10 Washer

Additional washers or spacers made be required and sourced locally to ensure that the belt alignment is correct.

If you do not already have the multi v belt and pulley fitted you will also need the following.

Crankshaft Pulley & Belt

1x RDG6076 Alternator Belt (PK6)

1x RDG6879 Crankshaft Pulley

3x RDG3923 Bolt M10 x 30 Cap Head Screw, BZP (crankshaft Pulley)

3x RDG1111 Washer

Crankshaft pulley bolts should have Loctite 242 or equivalent applied to the threads and be torqued up to 47NM (35-lb/ft)
